

Concept

Planning

- Research on problems
- Identify the problem domain
- Identify possible solution

Data Gathering

- Survey on Drivers
- Survey on Renters
- Review existing/related systems

Documentation

- Draft of project documentation
- Final documentation

Design

System

- Create SRS
- Design database
- Create UML Diagrams

User Interface

- Create Screen Layouts

Review Design

- Finalize the design

Development

Finalize development environment

Basic User Functionalities

- User Login
- User Registration

Renter User Functionalities

Driver User Functionalities

Testing

Testing/Debugging

Final Revision

- Revise Documentation
