

Concept

Planning

- Research on problems
- Identify the problem domain
- Identify possible solution

Data Gathering

- Survey on Drivers
- Survey on Renters
- Review existing/related systems

Design

System

- Design database
- Design diagrams
- Create Software Requirements Specification

User Interface

- Create Screen Layouts

Review Design

- Finalize the design

Development

Finalize development environment

Basic User Functionalities

- User Login
- User Registration

Renter User Functionalities

Driver User Functionalities

Implementation

Develop Installation Plan

Testing

Documentation

- User Manual

Maintenance

- Software Maintenance
